Health & Safety

EEC Group

We are committed to protecting the environment for all our customers, employees, neighbors' and Egypt.

Here is some of the ways we do this:

- Adoption of technologies for acid and flux recycling
- Use of natural gas in all heating operations
- Additives to suppress acid vapors
- Enclosure to capture fumes and protect employees
- Minimal use of water through clear operational procedures
- Waste is sold to recyclers
- Compact factory and production flow design to reduce electricity consumption
- Advanced heating technology reducing release of carbon compounds
- Planting of trees, plants and flowers at our site
- Use of energy-saving lighting in our offices.

To demonstrate our commitment EEC Galva is working towards the internationally recognized ISO14001 standard.
